RE: Site Inspection, NBS Mining (Deloy Shumway), Cougar #1 Mine, S/019/045 (UTU-76417), Grand County, Utah

Date of Inspection: October 27, 1998
Time of Inspection: 1303 - 1330
Conditions: Overcast, cool raining
Participants: Sal Venticinque, BLM; Tony Gallegos, DOGM

Purpose of Inspection: To examine the site of this proposed project located within an area heavily impacted by previous mining.

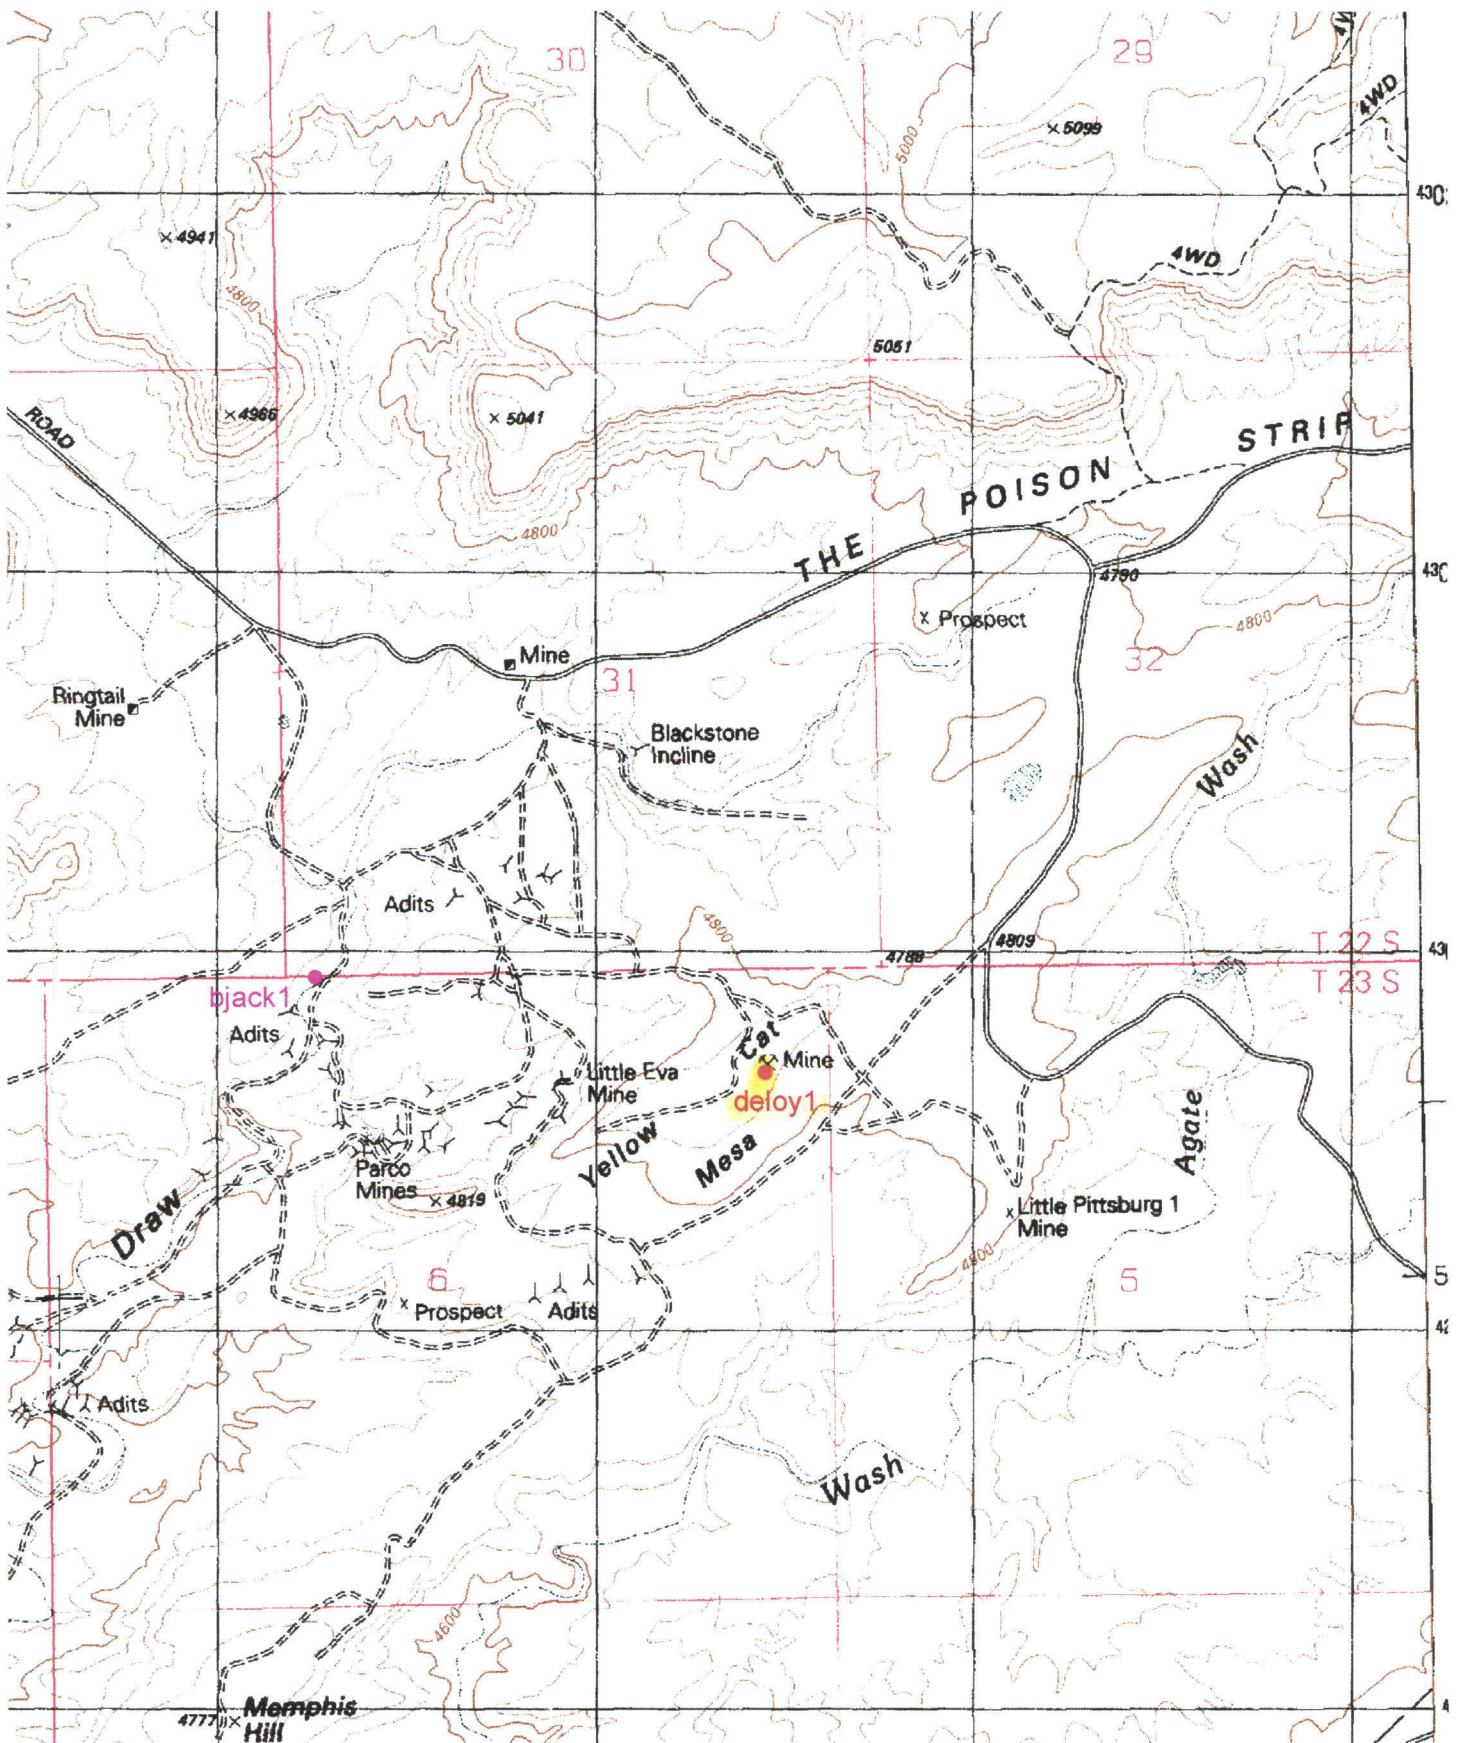

The site is accessed by taking exit #190 off Interstate 70 and turning south onto the Yellow Cat Road.

The project site includes several mine openings which are not shown on the Mollie Hogans quad map. There are two portal openings in the main area of proposed mining. A venthole is visible nearby marked by a 55-gallon drum which has been cut in half. This venthole is located to the east of the two mine portals.

The existing mining disturbances in the project area have considerable vegetative cover. This vegetative cover should make any new disturbances in the area easier to identify. Photographs were taken from the east end of the proposed project area. The inspection was cut short due to the increasing rain.

A GPS unit was used to take a location point between the two portals. The point was named "deloy1" in rover file R102720A. **The corrected UTM coordinates for this point are East 628,454.01090 North 4,299,678.95861.** A photocopy of a portion of the Mollie Hogans quad map showing the point location is attached.
